

The 1st International Domestic Animal DoHad and Epigenetics Symposium

Our symposium aims to shed light on the pivotal role that DoHad and Epigenetics play in understanding the health and well-being of domestic animals. As the very first event of its kind, it will serve as a unique platform for researchers, scientists, and professionals from around the world to exchange knowledge, share cutting-edge research, and foster collaborative relationships in these critical disciplines.

JULY 15–16, 2024

Dublin, Ireland
